BuffaLoam Product Information Sheet

ORGANIC POTTING SOIL

BuffaLoam Organic Potting Soil is a controlled potting medium. It is based on our 100% buffalo compost sourced only from our Diamond Tail Ranch in Northern Colorado. BuffaLoam products have been developed with a desire to continue the strong renaissance and regrowth of the majestic Bison.

Ingredients: BuffaLoam Organic Buffalo Compost, fine grade sphagnum peat moss, and fine pine bark.

Usage: Use BuffaLoam Organic Potting Soil to start and nurture bigger and stronger plant growth. The product's nutrient supply makes it perfect for potting and repotting houseplants, flowers and transplants.

Benefits: Its naturally low pH makes it an excellent choice for a wide range of house plants and flowers. An enhanced root system and improved moisture holding capacity are additional benefits of its use. The compost base provides an organic and natural source for plant nutrient supply.

All BuffaLoam products are OMRI Listed and tested under US Composting Council Testing Assurance Program.

Product Net Volume: 5 dry quarts (4.73 liters)

Case Pack: 4

Case Net Weight: 25 lbs.

Pallet Configuration: 11T X 4H = 44
